

Deck Jet

Water Effect

By Pentair Water Pool and Spa®

When water moves, magic happens

Perhaps nothing else soothes the soul like the sight and sound of moving water. That's why water features are such a popular and fast-growing enhancement to pools and poolside environments. With Deck Jet water effects from Pentair Water Pool and Spa®, you can add to the peace and tranquility of your poolside experience a number of ways...more economically than ever before.

- Deck Jet water effects are available with five unique spray patterns.
- Streams reach to eight feet, allowing an endless variety of design options.
- Create water arches, blossom designs or whatever your imagination can conceive.
- Attractive installation with no unsightly or unsafe edges or screws.
- Deck Jets won't collect debris like competitive designs.

So, don't just settle for a great pool experience...go all the way to magical...with Deck Jet water effects from Pentair.

Deck Jet

Water Effect

Each Deck Jet unit comes with 5 interchangeable nozzles—3 single streams, fan spray and tri-cluster.

Triple 3/16" streams

Single 3/16" stream

Single 1/4" stream

Single 5/16" stream

Fan spray

Early water features were designed for commercial applications and adapted to residential use. The result was over-engineering and high prices. The Deck Jet water effect from Pentair Water Pool and Spa® is specifically designed for residential use, using materials of construction and manufacturing techniques that allow lower costs. All-plastic construction of key parts lowers initial and lifetime system costs while providing trouble-free operation with little or no maintenance.

Deck Jet water effects can be cast into concrete decks and gunite pool walls, mounted in the sidewall of aboveground and vinyl-lined pools, or integrated into surrounding landscapes.

Features include:

- Jets install flush to surfaces to virtually disappear from sight.
- Spray height and direction are easily adjusted to vary water effects.
- Jets are easy to remove and replace to reduce long-term maintenance and allow new water effects.
- Low water pressure requirement for minimum impact on pump expense and performance (<3.5 gpm at 15 feet of head).

Drawing shows simplicity of installation—similar to other pool plumbing tasks.
