## Aboveground Sand Filter System

By Pentair Pool Products®

## The superior combination for efficiency and performance

Although sand filters are simple, effective and require very little attention, not all sand filters are created equal. For optimum performance, all of the water must flow through the same amount of sand at a proper rate. That's why Meteor® aboveground sand filter systems feature a special internal design that keeps the sand bed level, assures even water flow and results in the most effective filtration possible.

- "Even-Flow" internal design ensures that all pool water passes through the optimum amount of filter media; ensures crystal clear water with minimal maintenance.
- Powerful Dynamo® self-priming pump provides all the flow required for even the largest aboveground pools—features perfectly matched components for years of reliable service.
- Top-mounted, 6-position multi-port valve for easy control of all filter functions.
- Slotted lateral design prevents sand from entering your pool.
- Large pump strainer extends periods between cleanings.
- Strainer basket features a see-through lid—lets you check for debris at a glance.

# Meteor® Aboveground Sand Filter System

Multi-port valve for easy control of functions (backwash, rinse, filter, winterize, bypass to both pool and waste, and closed position)

Large pump strainer basket with see-through lid for easy monitoring

Dynamo® self-priming pump generates optimum flow

1 1/2" pressure sand drain for fast sand replacement

Durable platform base is strong and corrosion resistant

## Provides years of effective, carefree operation

Filter Model	Filter Area	Filter Diameter	Sand Required†	Flow Rate GPM*	Turnover Capacity		
					8 hrs.	10 hrs.	12 hrs.
58931800	1.8 Sq. Ft.	18"	65 lbs.	36	17,280	21,600	25,920
58931900	2.1 Sq. Ft.	20"	100 lbs.	42	20,160	25,200	30,240
58930000	2.5 Sq. Ft.	22"	150 lbs.	50	24,000	30,000	36,000

\* Maximum flow rate

† Use standard #20 silica sand

The Meteor® aboveground sand filter system features the same ultra-strong spherical tank design as our commercial-rated sand filters. This single-piece, blow-molded tank configuration features a uniform wall thickness that distributes stress evenly for maximum strength and durability. And because the tank is crafted of the toughest materials to withstand chemicals and the outdoor environment, you can expect years of trouble-free performance.

- Self-priming pump design protects internal components and ensures long life.
- Available in 18, 20 and 22 inch models to meet your pool's exact requirements.
- One-year limited warranty. See warranty for details.
