

Prowler® 720 Robotic Inground Pool Cleaner

By Pentair Water Pool and Spa®

Vacuums what you can see, filters what you can't

The Kreepy Krauly® Prowler® 720 is the computer-controlled, programmed cleaner that provides on-demand cleaning, totally independent of your pool circulation system, without running pumps.

Features include:

- Dual pressure-wash jets and powerful vacuum action lift sand, silt and algae off the pool floor and walls—including surface pores where brushes can't reach.
- Internal filtration system removes contaminants and bacteria as small as two microns.
- Auto-reverse feature prevents hang-ups in corners and by steps and ladders for continuous cleaning performance.
- Cleans any size, shape and type of standard residential pool in just 60-90 minutes.
- Fully automatic—no installation, no booster pump, no hoses.

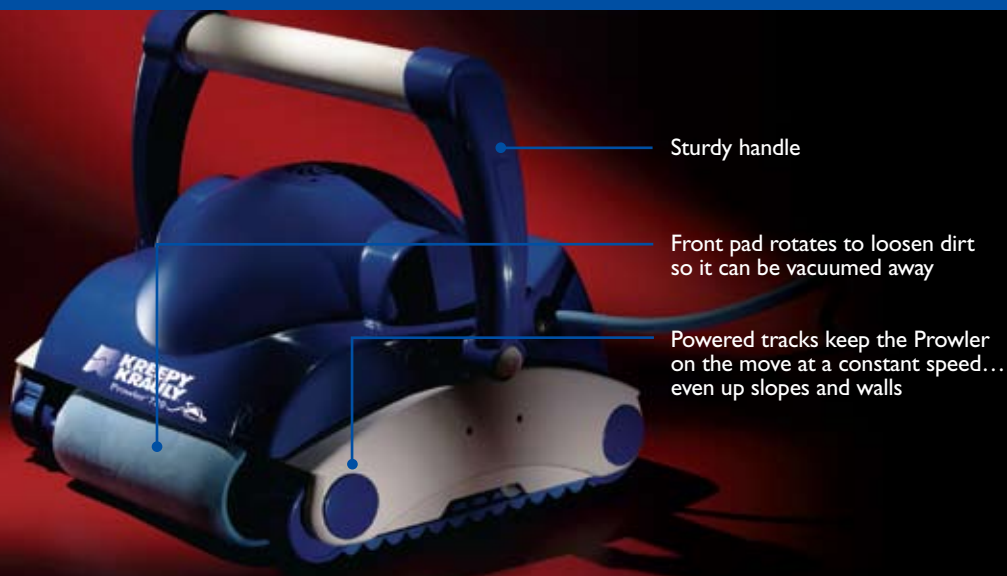

An Eco Select™ Choice

The Eco Select™ brand identifies our "greenest" and most efficient equipment choices. The Kreepy Krauly Prowler 720 robotic pool cleaner is powered by low-voltage electricity, rather than your pool pump or a booster pump. Plus, its built-in filter further reduces use of your pool's primary filtration system up to 25%, lowering energy costs even more, extending the life of both your pump and filter, and increasing the amount of time between filter cleanings.

As the global leader in pool and spa equipment manufacturing, we strive to provide greener choices for our customers. We hope you'll join us in embracing more eco-friendly pools by choosing Eco Select products for your swimming pool.

 The brand of choice for more than **3 million** pool owners worldwide.

Prowler® 720 Robotic Inground Pool Cleaner

Sturdy handle

Front pad rotates to loosen dirt so it can be vacuumed away

Powered tracks keep the Prowler on the move at a constant speed... even up slopes and walls

Powerful, efficient, and smart!

The Kreepy Krauly® Prowler® 720 robotic cleaner features the Aqua Smart System, an intelligent program that enables the cleaner to fully cover and efficiently clean any size, shape and type of standard residential pool in just 60-90 minutes. The high-speed drive motor propels the unit across pool surfaces while a high-efficiency pump motor delivers thorough, economical cleaning performance. No other cleaner cleans so completely at such a low operating cost.

Time- and energy-saving features:

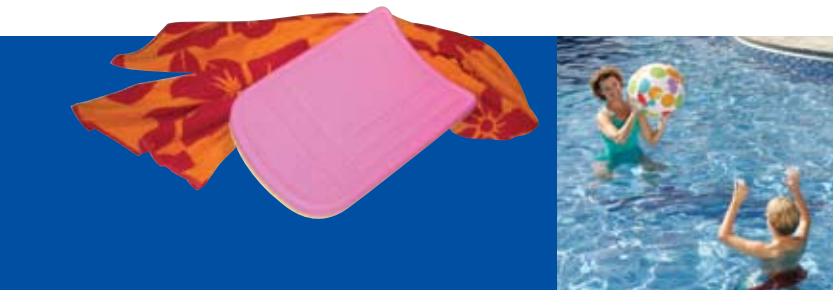

- Built-in filtration system reduces your primary system's run time by 25%.
- Removes algae, bacteria and all types of debris.
- Cleans and scrubs most pool steps.
- No installation or assembly required.

Photo shows Prowler 720 in a convenient, protective cradle for easy storage and transport.

Prowler 720 Robotic Cleaner		
Recommended pool size	20 x 50 feet	6.1 x 15.2 meters
Volume of water filtered	4,225 gal. / hr.	16m ³ / hr.
Floating cable length	60 feet	18 meters
Drive motor	24V DC high speed submersible	
Pump motor	24V DC high efficiency submersible	
Filter specification	Reusable 2 micron	
Electrical specification	115V / 60Hz	
Voltage in water	24V DC	

One-year limited warranty. See warranty for details.
