

PXC Series

Cartridge Systems for
Aboveground Pools by Sta-Rite®

Matched to perfection

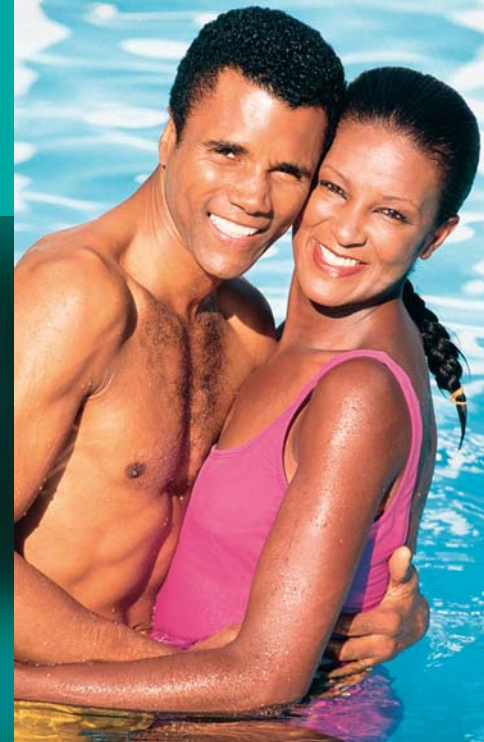

Put together the right pump and filter combination, and the result is a virtually maintenance-free pool. The PXC Series system is specially designed for aboveground pools, and features advanced technology that extends the time between cleanings. And maintaining the system is not only fast, it's also very easy. The system's high-capacity cartridge filter removes more dirt and is even capable of removing suntan lotions and body oils. Now that's squeaky clean!

- Cleaning the filter is as easy as opening the tank, spray-rinsing the cartridge element and closing it up. Cleaning the pump is just as effortless—simply empty the strainer basket and re-apply the lid.

- Cartridge filtration provides superior water clarity and adds a sparkling shimmer by day or night.
- PXC filter is power-molded from high-density thermoplastic to ensure long life.
- JWP pump is made of Dura-Glas™, an exclusive composite resin that stands tough against weather extremes and ultraviolet rays.
- Performance-matched components run quieter, so your poolside is always peaceful.

Looking for pool equipment to match your poolside lifestyle? Meet Sta-Rite's PXC system for aboveground pools.

PXC Series Cartridge Pool Systems

- Just one look**
Top-mounted pressure gauge is conveniently positioned for easy reading.
- Year-after-year toughness**
Rugged, high-density composite resin will never corrode and weathers the elements.
- Safe, easy access**
Posi-Ring® closure provides safe, easy access to the filter module. Fast in, fast out!
- Way less maintenance**
Large-capacity trap collects more dirt and extends the time between cleanings.
- Barely a sound**
Precision-engineered pump components significantly reduce sound emissions and won't intrude on those peaceful, quiet times.
- Fits right in**
Compact design and matte black finish blends well in any poolscape.

A winning combination

The system's perfectly matched JWP pump and PXC filter perform with the greatest of ease, resulting in increased energy efficiency and ultra-quiet operation. Pump and filter maintenance is minimized, so you get maximum enjoyment and relaxation from your poolscape. Also available with the Sta-Rite ABG pump. Ask your dealer which one is right for you.

Less maintenance ...YES!

The filter tank is designed to direct water through more of the filter's surface area, which boosts the cartridge's dirt-handling capacity without clogging. This extends the time between cleanings.

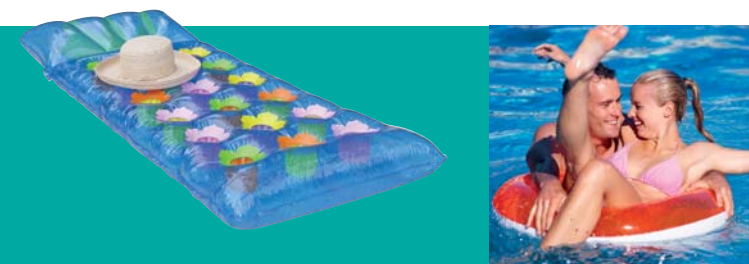

Spin and rinse

A quick spin of the Posi-Ring® closure and you have complete access to the filter module. Simply spray-rinse the cartridge and in minutes you're back to relaxation and fun.

Quick and easy

When cleaning is required, an easy twist of the wrist gives you access to the ultra-sized strainer basket. Simply empty the basket, re-attach the "clear-view" trap lid and twist it to the right.

Filter Performance

Model	JWP Pump (HP)	Filter Area (Sq. Ft.)	For Pools up to (Gal.) 8 Hr. Turnover	Optimal ¹ Performance at this GPM
SRPXC095JE	1	95	30,000	64
SRPXC095JO	1½	95	30,000	64
SRPXC150JO	1½	150	37,000	78

¹ Operating at this GPM will provide the longest filter cycles combined with the best and greatest dirt-loading capacity.

Operating Limits – Maximum continual operating pressure is 50 PSI. For pool/spa (bather) applications, the maximum operating water temperature within the filter is 104°F (40°C).

One-year limited warranty. See warranty for details.
