

⚠ DANGER

YOUR FILTER OPERATES UNDER PRESSURE. THE FILTER MAY CAUSE SEVERE INJURY OR DEATH FROM TANK EXPLOSION.

YOU COULD BE SERIOUSLY INJURED OR KILLED IF YOU DO NOT FOLLOW THE INSTRUCTIONS AND WARNINGS THAT COME WITH YOUR FILTER.

⚠ DANGER

IF YOUR FILTER HAS A PRESSURE RELIEF VALVE, YOU MUST USE THIS VALVE TO RELEASE ALL PRESSURE IN THE FILTER BEFORE DISASSEMBLING THE FILTER. FAILURE TO DO SO CAN RESULT IN SEVERE PERSONAL INJURY OR DEATH.

*** * * READ FILTER OWNERS MANUAL COMPLETELY BEFORE DOING ANYTHING TO THE FILTER. * * ***

An owner's manual comes with each filter. Since various filters have differences, the manuals are not all the same. A copy of the manual for your filter is available free at www.PentairPool.com/_____. A copy can also be obtained free from Pentair Pool or from your local Pentair Pool filter dealer.

The owner's manual for your filter contains instructions and warnings concerning the safe operation and cleaning of your filter.

Your filter has warning labels on it. Read and follow those warnings. However, your owner's manual has much more information in it. The warning labels on the filter are not a substitute for your owner's

manual.

The current warning labels for your filter are available free at www.PentairPool.com/_____. New or replacement warning labels can also be obtained free from Pentair Pool or from your local Pentair Pool filter dealer.

This warning does not replace your owner's manual. This warning highlights only some of the important information and warnings contained in your owner's manual.

SOME IMPORTANT SAFETY INFORMATION AND WARNINGS ABOUT FILTERS IN GENERAL:

1. Filters are designed to filter water. If air gets into your filter circulation system (for example, when any part of the system is taken apart or serviced), pressurized air can cause the lid to be blown off. YOU COULD BE SERIOUSLY INJURED OR KILLED IF YOU ARE TOO CLOSE TO THE FILTER.

2. Your filter operates under pressure. When the pump is turned on, the pump can pressurize the filter circulation system. Stay clear of the filter when it is turned on (except to close the air relief valve once all air has been let out of the system). Do not place your head, arms or other body parts over the top of the filter when the pump is turned on. IF THE TOP COMES OFF WITH FORCE, YOU COULD BE SERIOUSLY INJURED OR KILLED.

3. The closure mechanism that holds the lid to the bottom part of the filter must be securely fastened before the filter system is turned on. THE FAILURE TO SECURELY AFFIX THE CLOSURE MECHANISM COULD RESULT IN THE LID BLOWING OFF, CAUSING SERIOUS INJURY OR DEATH.

4. There is no safe way to fix a leak or to adjust the closure mechanism or to service any part of your filter while the filter system is turned on. Turn off the filter system before attempting to service or fix or adjust your filter or any part of it. ATTEMPTING TO DO ANYTHING TO YOUR FILTER WHILE IT IS TURNED ON MAY CAUSE SERIOUS INJURY OR DEATH (except that you may close the air relief

valve once all air has been let out of the system).

5. There are professionals who can take care of your filter system equipment and pool or spa. If you have questions or want more information, you may contact Pentair Pool, your local filter dealer, or your filter professional. If you need it, get help. THE FAILURE TO FOLLOW INSTRUCTIONS OR WARNINGS COULD RESULT IN SERIOUS INJURY OR DEATH.
