NOW, SAFER, CRYSTAL CLEAR WATER CAN BE AUTOMATIC, TOO

Want to save more time and money while keeping pool and spa water safer and sparkling clean in the easiest, most effective and convenient way? Order your EasyTouch® Control System with a built-in IntelliChlor® Salt Chlorine Generator.

The IntelliChlor generator uses common table salt to produce all the chlorine your pool needs and is clearly the leading system on the market. What’s more, by adding an IntelliChlor generator to your EasyTouch system, you’ll automate the sanitation task for a much lower investment.

Key features and advantages of the IntelliChlor generator include:

• Same sanitization performance as manual chlorine addition without the drawbacks.
• No need to buy, transport and store expensive chlorine compounds.
• No more odor, stinging eyes and irritated skin.
• Produces water with a softer, silkier feel that comes when only pure chlorine is at work.

Unlike conventional chlorine additives that must be constantly replenished, with the IntelliChlor generator the salt is recycled continuously, day after day, to further reduce pool maintenance requirements. The IntelliChlor generator is also the most technologically advanced salt chlorine generator you can buy.

• IntelliChlor generators clean themselves with an automatic reverse-cycling feature that helps prevent scale build-up for longer cell life.
• Most user-friendly generator on the market. Running stand-alone, select from one of five sanitizing levels to easily manage chlorine addition. Or, adjust in 1% increments using your EasyTouch system controller.
• All performance data—production settings, hours of operation, chlorine output, cell-cleaning cycles, salt readings and water temperature averages—are visually displayed on cell via LED lights, making it easy to maintain perfect water.

• Superior cell life tracking feature communicates remaining hours of life so you only change the cell when necessary, not on a fixed schedule that may not provide maximum benefit.

• Integrated sensors to ensure water flow is adequate for safer chlorine generation. Under low water temperature conditions, automatic shut-off feature protects the unit and prolongs cell life.

ADDED RELIABILITY FOR ULTIMATE CONTROL

For the ultimate in pool chemical management, pair the IntelliChlor generator with an IntelliChem® Chemical Controller. When combined, these two products deliver the precise amount of chemicals to keep pool water clean, clear, safer and in perfect balance...automatically. Add an EasyTouch system and ScreenLogic® Interface, and enjoy pool and spa control using an iPhone®, iPad®, iPod touch® mobile digital device, Android® device, Mac® computer or PC, anywhere...anytime.

The IntelliChlor generator in the way you need it to generate salt that provides optimal help for the IntelliChem controller. Salt levels, cell cleanliness, chlorine output and water flow can be viewed at a glance.

EASYTOUCH®
CONTROL SYSTEMS PAIRED WITH AUTOMATED CHEMICAL MANAGEMENT

Because automation makes it all so simple!
The EasyTouch system control panels make programming easy, while the LCD displays guide you step-by-step through the process. The latest EasyTouch systems are fully programmable, offering a wide range of options, and are capable of being controlled from anywhere in the world.

EasyTouch systems are available for separate pools and spas, as well as pool/spa combinations with shared equipment. Each system has a control panel that controls four or eight accessory functions. Four-function systems are typically used to control pool and/or spa operation plus up to eight附件 functions and eight separate scheduling functions. Eight-function systems allow separate scheduling for additional features, such as landscape lighting, waterfalls, fountains, additional heaters, pumps, and more.

Scheduling and controlling the operation of pool and spa equipment and related poolscape accessories has never been easier, and at affordable rates after the launch of EasyTouch systems in early 2000. They eliminated the inconvenience of repeated trips to the equipment pad, programming for a separate thermostat, opening and closing valves, and retesting timer clocks and thermostats.

What’s more, EasyTouch systems are the standard for operation simplicity with push-button operation and clear, intuitive instructions and displays. Today, the EasyTouch system family offers even more features, options and technology while remaining affordable for any inground pool owner. They also remain the simplest way to program and operate…push-button simple.

EasyTouch systems are available for separate pools and spas, as well as pool/spa combinations with shared equipment. Each system has a control panel that controls four or eight accessory functions. Today, the EasyTouch system family offers even more features, options and technology while remaining affordable for any inground pool owner. They also remain the simplest way to program and operate…push-button simple.

Today, you can also choose from systems that incorporate the revolutionary IntelliChlor® Salt Chlorine Generator. Full chlorination using salt water is the easiest, most effective and convenient way to keep pool water sparkling clean. As you can see, with EasyTouch systems, pool, spa and poolside accessory operations—including sanitization—becomes as simple as operating your automatic lawn sprinkling system.

EasyTouch® Control Systems

Who Says Pool Automation Has to Be Costly and Complicated?

The EasyTouch system allows full onboarding and spa temperatures to jets, lighting, water features and more—right from your favorite Apple® or Android® device. The ScreenLogic interface gives you access to your pool’s and/or spa’s operation from practically anywhere, anytime using your PC, Mac® computer, iPad®, iPhone®, iPod touch® mobile digital device or Android device. Whether you’re across the deck or around the globe, pool control has never been this easy.

The Ultimate Convenience in Poolside Control—Right at Your Fingertips.

EasyTouch systems are available for separate pools and spas, as well as pool/spa combinations with shared equipment. They come in systems that control four or eight accessory functions. Four-function systems are typically used to control pool and/or spa operation plus spa lights and up to six time clocks and thermostats. Eight-function systems allow separate scheduling for additional features, such as landscape lighting, waterfalls, fountains, additional heaters, pumps and more.

EasyTouch systems in early 2000. They eliminated the inconvenience of repeated trips to the equipment pad, programming time clocks, opening and closing valves, and resetting time clocks and thermostats.

What’s more, EasyTouch systems set the standard for operating simplicity with push-button operation and clear, intuitive instructions and displays.

The EasyTouch system control panel makes programming easy, while the LCD displays and self-test diagnostics make service repair purposes.

The electronic self-test includes built-in, self-test diagnostics that incorporate the revolutionary IntelliChlor® Salt Chlorine Generator. Today, you can also choose from systems that incorporate the revolutionary IntelliChlor® Salt Chlorine Generator. Such systems use table salt to create pure chlorine for pool sanitization the effective and convenient way to keep pool water sparkling clean.

IntelliChlor generators use table salt to create pure chlorine for pool sanitization the effective and convenient way to keep pool water sparkling clean. For added flexibility and convenience, indoor spas and wireless remote control devices can be added to any EasyTouch system (see next page). The Load Center unit installed near your pool or your service professional from outside your home.

Scheduling and controlling the operation of pool and spa equipment and related poolscape accessories becomes entirely automatic, even while you’re away. After the intuitive, self-test diagnostics make service repair purposes.

SO SIMPLE. SO CAPABLE. SO RELIABLE.

• All functions are controlled with easy, push-button devices from the totally self-contained Load Center or optional controllers. Operation efficiency and variable performance is the automatic way, Electronic chlorine generation is the easiest, most effective and convenient way to keep pool water sparkling clean.

• The EasyTouch system allows full programming capability from any mobile device or wireless remote. The ScreenLogic interface provides a simple, user-friendly display to program usage patterns.

• The electronic self-test includes built-in, self-test diagnostics. No need for added control panels or optional controllers. No need for service personnel to enter your home.

• The Load Center unit installed near your pool or your service professional from outside your home.

• With an optional ScreenLogic interface kit, you can remotely manage your pool and spa equipment from your Apple® or Android® mobile device or Android device. Use the History page to monitor temperature, pool/spa, heater and spa-side and wireless remote control devices that are installed in your EasyTouch system (see next page).

• As you can see, with EasyTouch systems, pool and spa equipment is automated, including sanitization. The ability to verify correct indicators, relay outputs, valve outputs, display, microprocessor, switches, and spa-side and wireless remote control devices.

• For pool/spa combinations with a shared body of water, you also receive built-in, self-test diagnostics make service repair purposes.

• Built-in, self-test diagnostics make service repair purposes.

The Eas yTouch system allows full
onboarding anywhere, anytime using your PC, Mac® computer, iPad®, iPhone®, iPod touch® mobile digital device or Android device. The ScreenLogic interface gives you access to your pool’s and/or spa’s operation from practically anywhere. Whether you’re across the deck or around the globe, pool control has never been this easy.

Add an optional ScreenLogic® Interface Kit to your EasyTouch system, and you can control everything from pool accessories. It’s like putting pool and spa automation in a single unit to operate from anywhere.

THE ULTIMATE CONVENIENCE IN POOLSIDE CONTROL...RIGHT AT YOUR FINGERTIPS.

IT’S LIKE PUTTING POOL AND SPA OPERATIONS ON CRUISE CONTROL...

EasyTouch systems are available for separate pools and spas, as well as pool/spa combinations with shared equipment. You can choose from systems that control four or eight accessory functions. Four-function systems are typically used to control pool and/or spa operation plus optional spillways and fountains. Eight-function systems allow you to separate scheduling for additional features, such as landscape lighting, waterfalls, fountains, additional blowers, pumps and motors.

AND AUTOMATING WATER SANITIZATION, TOO.

Today you can choose from systems that incorporate the revolutionary IntelliChlor® Salt Chlorine Generator. Installed in your equipment pad, membrane salt electrolysis creates pure chlorine for pool sanitization the convenient and automatic way. Electrolytic chlorine generation is the easiest, most effective and convenient way to keep pool water sparkling clean.

NOW, SAFER, CRYSTAL CLEAR WATER CAN BE AUTOMATIC, TOO

Unlike conventional chlorine additions that require constant reactivity, the IntelliChlor® generator continuously reacts with the pool water to help maintain proper chlorine levels. The IntelliChlor® generator is also the most technologically advanced salt-chlorine generator you can buy.

The IntelliChlor generator cleans themselves with an automatic electrode changeout that helps control scale build-up for longer cell life.

Most user-friendly generator on the market. Features an LED display that makes it easy to maintain pool perfection.

Superior cell life tracking feature continuously monitors hours of operation so you can change the cell when necessary. An LED indicator that shows you exactly when maintenance is due.

Integrated sensors to ensure water flow is adequate for safe chlorine generation. Under low water temperature conditions, automatic shut-off protects the unit and prolongs cell life.

There is a DayTouch system for every application with up to eight control circuits designed to monitor pools, spas and pool/spa combinations. Shown in the left are the members of the DayTouch system family, as well as optional accessories.

AN ECO SELECT® BRAND PRODUCT

The Eco Select brand helps you to “green out” your pool/spa equipment choices. Eco Select can optimize energy use and equipment performance by automatically synchronizing systems to optimize energy use and most efficient equipment choices. EasyTouch systems can optimize energy use and equipment performance by automatically synchronizing systems to optimize energy use and most efficient equipment choices. The Eco Select brand helps you to “green out” your pool/spa equipment choices. We help you pick an environment-friendly package by choosing Eco Select branded products for your swimming pool.

The IntelliChlor generator is the only salt-chlorine generation that provides you with helpful water chemistry guides. Soft water, hard water, mineral deposits, water clarity, and water hue can be analyzed at a glance.

EASYTOUCH® CONTROL SYSTEMS FAMILY

For the ultimate in pool chemical management, pair the IntelliChlor® generator with an EasyTouch® Control System featuring the ScreenLogic® Interface, and the SpaCommand® Remote (multiple cable lengths and colors) – accessible anywhere, anytime.

There is an EasyTouch system for every application with eight control circuits designed for monitoring pools, spas and pool/spa combinations. Shown in the left are the members of the EasyTouch system family, as well as optional accessories.
